State Farm - Author Guide

Quick Reference

Resource	URL
Document Authoring (DA)	https://da.live/#/adobedrago/statefarm-eds/
Preview	https://main-statefarm-eds-adobedrago.aem.page/
Live	https://main-statefarm-eds-adobedrago.aem.live/
Block Library	https://da.live/#/adobedrago/statefarm-eds/.da/library
Bulk Operations	https://da.live/apps/bulk
GitHub Repo	https://github.com/AdobeDrago/statefarm-eds

Sites

Site	Content Source (DA)	Preview	Live
statefarm-eds	https://da.live/#/adobedrago/statefarm-eds/	https://main-statefarm-eds-adobedrago.aem.page/	https://main-statefarm-eds-adobedrago.aem.live/

Getting Started

Access Requirements

- ☐ Document Authoring (DA) access — request from your project admin
- ☐ Preview and publish permissions for statefarm-eds
- ☐ GitHub account (optional, for developers only)

Your First Page

1. Open Document Authoring: <https://da.live/#/adobedrago/statefarm-eds/>
2. Navigate to the folder where you want to create your page
3. Click **New** → **Document**
4. Add your content using headings, paragraphs, images, and blocks from the Library sidebar
5. Add a **Metadata** block at the bottom of the page with at least a title and description
6. Click **Preview** to review your changes on the staging environment
7. Click **Publish** to make the page live

Content Organization

Site Structure

Content lives in Document Authoring (DA) under the `adobedrago/statefarm-eds` workspace. The typical folder structure mirrors the live site URL paths:

Folder	Purpose
<code>/nav</code>	Global navigation (header)
<code>/footer</code>	Global footer
<code>/insurance/</code>	Insurance product pages
<code>/ (root)</code>	Homepage and top-level pages

Navigation and Footer

The site navigation and footer are content-managed documents in DA:

Document	DA Path	Purpose
Navigation	<code>/nav</code>	Global header navigation and links
Footer	<code>/footer</code>	Site-wide footer with links and legal text

To update navigation or footer: 1. Open the `/nav` or `/footer` document in DA 2. Make your changes 3. Preview → Publish

Block Library

The **Block Library** is the sidebar in Document Authoring where you browse and insert pre-built content components (blocks) into your pages.

What	Details
Open in DA	Click the Library icon in the DA editor sidebar, or go directly to: https://da.live/#/adobedrago/statefarm-eds/.da/library
What's in it	All blocks listed in the “Available Blocks” section below
How to use	Click a block in the library to insert it at your cursor position

When building a page, always use the Library sidebar to add blocks rather than typing block names manually — this ensures correct formatting.

Available Blocks

Block	Purpose	Variants	When to Use
accordion-faq	Expandable FAQ sections with question/answer pairs	(none)	FAQ sections, expandable content lists; not suited for content that must always be visible
cards-article	Article cards with image, title, and description	(none)	News listings, blog post grids, article indexes
cards-checklist	Checklist-style cards for feature comparisons	(none)	Insurance coverage comparisons, feature lists
cards-coverage	Coverage option cards with details	(none)	Insurance product coverage options
columns-agent-cta	Two-column layout for agent contact call-to-action	(none)	Agent finder sections, contact prompts
columns-category	Two-column layout for category navigation	(none)	Product/service category browsing sections
columns-promo	Two-column promotional layout	(none)	Promotional banners, marketing callouts
columns-subnav	Two-column layout for sub-navigation	(none)	In-page section navigation
hero-quote	Full-width hero banner with quote form	lifestyle	Page heroes with insurance quote entry; use lifestyle variant for image-led lifestyle photography layout
header	Global site header and navigation	(none)	Auto-added to every page — do not insert manually
footer	Global site footer	(none)	Auto-added to every page — do not insert manually

Note: The header and footer blocks are added automatically by the platform. You do not need to add them to your pages.

Page Templates

This project does not currently use custom page templates. All pages use the default layout. Apply section styles and blocks to achieve different visual treatments.

Configuration Sheets

Configuration sheets control site-wide settings. They live in DA and are published just like regular pages.

Sheet	DA Location	Purpose	When to Update
Placeholders	/placeholders	Reusable text strings (button labels, UI text)	Changing button text, labels, or reusable strings site-wide
Redirects	/redirects	Forward old URLs to new destinations	After deleting or renaming pages
Bulk Metadata	/metadata	Apply metadata properties to groups of pages by URL pattern	Setting default titles, descriptions, or tags for a section

Redirects Format

When you delete or rename a page, always add a redirect first:

Source	Destination
/old-page-url	/new-page-url

After updating the redirects sheet, preview and publish it for the changes to take effect.

Publishing Workflow

Environment	Domain	Purpose
Preview	https://main--statefarm-eds--adobedrago.aem.page/	Staging — test your changes before going live
Live	https://main--statefarm-eds--adobedrago.aem.live/	Production — visible to all users

Standard workflow: Edit in DA → Preview → Review → Publish → Live immediately

Bulk publish/unpublish: Use <https://da.live/apps/bulk> for publishing or unpublishing multiple pages at once.

Common Tasks

Task	Steps
Create a new page	Navigate to the target folder in DA → New → Document → Add content → Add Metadata block → Preview → Publish
Edit an existing page	Open the document in DA → Make edits → Preview to verify → Publish
Delete a page	Add a redirect in /redirects first → Delete document in DA → Publish the redirects sheet
Update navigation	Open /nav in DA → Edit links and structure → Preview → Publish

Task	Steps
Update footer	Open / footer in DA → Edit content → Preview → Publish
Add a redirect	Open / redirects in DA → Add a new row (Source, Destination) → Publish
Update a placeholder	Open / placeholders in DA → Find and update the key → Publish

Sections and Section Metadata

Sections are how you divide a page into distinct visual regions. Create a new section by inserting a horizontal rule (---) between content areas.

Add section styles by placing a Section Metadata block at the end of the section:

Section Metadata	
style	grey

Available Section Styles

Style	Effect
light	Light grey background (same as grey)
grey	Light grey background
dark	Dark background with white text
accent	Red brand color background with white text
legal	Small print styling (12px font) for legal/disclaimer text

Page Metadata

Add a **Metadata** block at the bottom of every page. This controls how your page appears in search results and when shared on social media.

Property	Required	Purpose	Example
title	Yes	Page title shown in browser tab and search results	Auto Insurance - State Farm
description	Yes	Summary shown in search engine results	Get a fast, free auto insurance quote from State Farm.
image	No	Image used when page is shared on social media	/images/auto-og.jpg

Property	Required	Purpose	Example
robots	No	Control search engine indexing	noindex (to hide from search)

How to add a Metadata block:

Metadata	
title	Your Page Title
description	A brief description of this page for search engines

Images and Media

Method	How
Drag and drop	Drag image files directly into the DA editor
AEM Assets	Use the Assets sidebar in DA to browse and insert managed assets

Best practices: - Use descriptive filenames (e.g., auto-insurance-family.jpg not IMG_1234.jpg) - Always add meaningful alt text for accessibility - Images are automatically optimized for web delivery — no manual resizing needed - Keep source images high quality; the platform handles compression

Troubleshooting

Issue	Solution
Page not updating after publish	Wait 1–2 minutes for CDN cache to clear, then do a hard refresh (Cmd+Shift+R on Mac, Ctrl+Shift+R on Windows)
Block not displaying correctly	Check that the block table structure matches the expected format; verify any variant name spelling
Hero quote form not showing	Ensure the hero-quote block has the product form row in the correct position
Images not appearing	Verify the image was uploaded to DA and the path in the document is correct
Navigation changes not live	Check that the /nav document was published, not just previewed
Redirect not working	Confirm the /redirects sheet was published; redirects require an exact URL match
Section style not applying	Verify the style name is spelled correctly in the Section Metadata block (case-sensitive)
